## Climate

Winter weather was mild and sunny while spring saw lower than average temperatures and frequent rain showers. These climatic conditions persisted up until the end of May and affected bud break of all grape varieties, causing a delay of approximately 10 days. The month of June brought dry weather; the vines benefitted from generous groundwater reserves and maintained good vine balance even during the hot month of August, conditions that allowed complete veraison and a slow regular ripening phase. Optimal temperature swings between day and night produced grape clusters that were healthy and rich in aromatic compounds. The decision of when to pick was taken after carefully determining the right balance between sugar concentration and the fullest expression of the grape varieties' aromatic profiles. Harvesting began with Sauvignon Blanc towards the end of August and was completed with Sémillon mid-September.

## Vinification

Grape clusters were hand harvested and immediately brought to the cellar where they were cooled down on a refrigerated conveyor system lowering the temperature of the berries before pressing therefore preserving characteristic varietal aromas. Each grape variety was fermented separately. After a gentle pressing, the must was kept at a controlled temperature of 10 °C (50 °F) for several hours to facilitate natural clarification, then transferred to stainless steel tanks where alcoholic fermentation took place at a temperature that did not exceed 16 °C (61 °F). Once this phase was complete, the wine was kept at a controlled temperature of 10 °C (50 °F) to prevent malolactic fermentation and perfectly preserve organoleptic qualities. Fresh, vertical and slightly aromatic Sauvignon was blended with soft, tropical Sémillon, one grape variety completing the other.

## Historical Data

The vineyards selected to be utilized for the Conte della Vipera are located at an altitude between 825 and 1050 feet (250-350 meters) above sea level on soils rich in marine fossils. The wine takes its name from first proprietors of the Castello della Sala, and the label shows the 13<sup>th</sup> century Saint John's Chapel (the Cappella d San Giovanni) situated on the estate. The first vintage of Conte della Vipera to be produced was the 1997.

## Tasting Notes

Conte della Vipera 2019 is straw yellow with light greenish and golden hues. Its nose opens with intense notes of white flowers that blend with aromas of grapefruits, figs and ginger. On the palate it's fresh, vibrant and savory with nuances of citron peel, aromatic herbs and elderflowers.
