## Climate

Autumn 2004 was mild and much rainier than recent years. The winter that followed was cold and dry, which compensated considerably for the level of accumulated rain from the autumn. Budbreak was slightly late although the spring temperatures enabled the plants to recover well. The summer was mild and temperatures did not exceed a maximum of 35 °C. The grapes ripened gradually and steadily. The foggy mornings and sunny afternoons in October and November caused perfect development of botrytis and consequently excellent concentration of sugars and aromas.

## Vinification

The grapes were grown in the Castello della Sala vineyards, at altitudes between 200 and 300m a.s.l. on clayey soil rich in marine fossils. The grapes developed Botrytis Cinerea and were brought to the cellar with perfectly balanced sugar and aroma concentration. The harvest began in October and lasted until November. The morning mists ensured the presence of botrytis and water loss was facilitated by the afternoon sunshine. The Traminer and Riesling grapes were harvested a few days before the Sauvignon Blanc, while the Grechetto grapes were harvested in late October and early November. After soft crushing the must was fermented for about 20 days at a temperature of about 17 °C. The sweet wine obtained was placed in French oak barriques (Alliers and Tronçais) where it remained for about 6 months. The wine was then blended and bottled.

## Historical Data

Muffato della Sala is produced with grapes with “noble rot”, harvested in late October and early November to allow the morning mists to develop of Botrytis Cinerea, or noble rot on the grape berries. This type of mould concentrates the water of the crop, its sugars, and its aromas, endowing the Muffato della Sala with a harmonious and unmistakable fragrance. The first year to be produced was the 1987 and consisted of the blend of varieties such as Sauvignon Blanc (50%); Grechetto (30%) and Drupeggio (20%). The composition of the blend has varied over the years and now has attained its definitive results. Muffato della Sala is a fascinating wine, an expression, in small quantities, of the nature of a unique *terroir*.

## Tasting Notes

Medium-gold color with peachy-honey aromas. A rich dessert wine that is fresh and well-balanced, with great elegance and complexity.
